

CDOL Tip of the Week. October 24, 2011

CDOL Use: The Reports Section on the Home Page

Some users may find the reports found under the reports section useful. These reports give statistical information on the location and quantities of certain organization types broken down by different categories. For most users there are three reports visible (see below).

- **Church Organization Totals – General:** This report shows an overview of current counts for the following organization types: Areas, Temples, Missions, Stakes, Districts, Wards, and Branches. The numbers are broken down globally, and then by US/Canada, US, Utah, Canada, and outside US/Canada.
- **Church Organization Totals – by Country:** This report lists by country the current counts for the following organization types: Temples, Missions, Stakes, Districts, Wards, and Branches.
- **Church Organization Totals – by Church Area:** This report lists the same organizations as in the previous report, broken down by active areas in the Church.
- A fourth report is available to certain users who are given additional rights because of their responsibilities or callings, usually temple-related. This fourth report displays the same counts for the organizations in the previous report, but by temple district.
